

ENERGY AUDITS

- ✓ Reduce electricity bills
- ✓ Increase operational efficiency
- ✓ Improve carbon footprint

We perform energy audits, which is an assessment of the energy needs and efficiency of a building. Energy audits involves site surveys and analysis of energy flows. Our aim is to identify energy management opportunities that will result in energy savings and environmental conservation. Our recommendations take South African regulations, including health and safety aspects into account.

AEE Certified Energy Managers (CEM)

We are proud to announce that our team member Dries Louw (BEng E, Pr Eng) is registered as a Certified Energy Manager with the Association of Energy Engineers (AEE). "The CEM certification is the most widely recognized Energy Management certification around with world."

Our services include:

- Walk through inspections
- Energy monitoring, verification and reporting
- Evaluation of lighting installations
- Baseline studies
- Load shifting
- Demand side management
- Power Factor studies
- Renewable energy recommendations
- Electrical Engineering Services including design and project management
